

ILYA OBRETETSKIY

Full Stack Developer

+447564055308 @obreil54@gmail.com <https://ilyaobretetskiy.com/>
London, UK

SUMMARY

Versatile Full Stack Developer with a background in Public Relations and Public Affairs, providing a unique blend of technical and strong communication skills. Recent graduate of the Le Wagon Web Development bootcamp and looking forward to applying my newly acquired skill set in a professional setting. Passionate about leveraging evolving technologies to creatively solve real-world problems.

EDUCATION

Web Development 2023
Le Wagon London London, UK

- Successfully completed a rigorous 9-week full-time, BCS-accredited coding bootcamp, immersing in an intensive curriculum focused on HTML, CSS, JavaScript, SQL, and Ruby on Rails
- Acquired hands-on experience with version control using Git, through collaboration on projects using GitHub, and deploying web applications on Heroku
- Engaged in a collaborative learning environment, actively participating in pair programming and contributing to team projects
- Worked closely with classmates in pairs and teams of four to tackle diverse coding challenges, fostering a dynamic and cooperative coding experience

B.Sc. in International Affairs (Political Science Concentration) 2016 - 2020
Florida State University Tallahassee, FL, USA

EXPERIENCE

Web Development Contractor 2024
Magnet Volgograd, Russia (Remote)

- Worked closely with the head of IT at the company to develop a Ruby on Rails web application from scratch
- The application will be serving as an auditing tool for monitoring the condition of IT equipment loaned to employees, ensuring enhanced accountability and operational efficiency

Research Executive 2022 - 2023
Rud Pedersen Public Affairs London, UK

- Responsible for monitoring and reporting on the developments relevant to the respected clients and industries, ensuring that the team had up-to-date and insightful information
- Contributed to a high-performing public relations team that secured tier 1 placements, including a notable op-ed in the Financial Times
- Collaborated with a cross-functional team, working closely with web developers to successfully deliver a company website for an investment banking client. Facilitated seamless communication between the client and the development team while actively shaping the website structure using the Storyblok CMS

Intern 2021 - 2022
Kreab London London, UK

- Conducted thorough desktop research, providing vital support to project teams and contributing valuable insights to decision-making processes
- Prepared daily monitoring reports for client-related coverage
- Leveraged strong writing skills to draft and edit external press releases and other communications for both international and UK clients
- Played a key role in supporting new business initiatives through proactive research and networking activities

Assistant Researcher 2021
PRISM Political Risk Management London, UK

- Conducted research and gathered data on companies in the Central Asian energy sector, leveraging native language skills for nuanced insights
- Contributed personal insights and experience on Eastern Europe, enriching the team's understanding of the geopolitical landscape
- Delivered insightful analyses on pertinent political and business developments in Eastern Europe and Central Asia
- Collaborated seamlessly with team members to produce comprehensive company profiles for organizations of strategic interest

SKILLS

HTML · CSS/SCSS · Bootstrap · JavaScript ·
Ruby on Rails · OOP · Capybara · Selenium ·
Python · SQL · GIT · GitHub · Heroku · Figma

PROJECTS

IT Audit (Ongoing)

Centralized auditing platform for tracking the condition of IT equipment loaned out to employees

- Implemented a dual authentication mechanism; a traditional login-password approach for admins, and a passwordless system for general users, enhancing security and user experience
- Utilised Rails Admin with additional gems for XLSX import capabilities, enabling flexible data handling
- Created Rails Admin custom actions for tailored reporting and exporting functionalities, significantly streamlining administrative workflows

<https://github.com/obreil54/Magnet-Questionnaire>

Cheddar (Ongoing)

Streamlined job application platform for graduates

- Took charge of developing a form-filling tool using Capybara and Selenium, integrated with a Chromium browser. This tool enables users to seamlessly apply to multiple jobs on various Applicant Tracking Systems directly within our application, enhancing efficiency and speed of applications
- Implemented various front-end features, including the integration of an external API to dynamically fetch and display logos for companies and universities

<https://github.com/Ches-ctrl/Cheddar>

Rentr

C2C car-rental platform

- Collaborated with a team of four bootcamp students during a one-week sprint to successfully develop and deploy a comprehensive Rails application
- Took charge of the back-end functionality, including implementing user authentication through Devise to ensure a secure and seamless user experience
