

Ilya Obretetskiy

Full-Stack Developer - Ruby on Rails, Stimulus, JavaScript, PostgreSQL

obreil54@gmail.com • ilyaobretetskiy.com • linkedin.com/in/ilya-obretetskiy-b5010b1b5/ • London, UK

Summary

Full-Stack Developer specialising in **Ruby on Rails**, with professional experience building and maintaining both modern and legacy systems. Strong backend focus with deep experience in SQL-heavy architectures. Currently leading efforts to introduce automated testing and improve system reliability.

Experience

Wine Owners

London, UK

Junior Developer

06/2025 - Present

Developed and maintained a large-scale **ASP.NET Web Forms** application backed by **MS SQL Server**, with core business logic implemented across complex stored procedures and functions.

- Debugged and optimised end-to-end data flows across **SQL**, **C#** and front-end layers, improving reliability and performance of key features.
- Implemented client-specific features within a configurable system, including developing bespoke billing logic for different clients while working within legacy architecture constraints.
- Introduced **automated testing** into the system's backend through the use of **tSQLt**, increasing confidence in deployments and reducing the risks of introducing bugs.

Shers Studios — https://github.com/obreil54/she_and_hers

London, UK

Web Development Contractor

09/2024 - 12/2024

Developed and deployed a fully custom **Ruby on Rails** e-commerce platform replacing a Wix setup for an independent fashion brand. Built with **Stimulus.js**, **PostgreSQL**, and **Devise** for authentication.

- Integrated **Stripe** for secure payment and **Shippo** for automated shipping rates, label generation, and tracking.
- Automated product updates with **Google Merchant**, improving search visibility.
- **37x increase** in newsletter sign-ups through **Brevo** email integration.

Magnat — <https://github.com/obreil54/Magnat-Questionnaire>

Volgograd, Russia (Remote)

Web Development Contractor

02/2024 - 09/2024

Developed a **Ruby on Rails** web application for IT equipment auditing, built with **Stimulus.js**, **PostgreSQL**, and **Active Record**. Designed to track the condition of loaned devices. Now actively used by **100+ employees**.

- Implemented **dual authentication**: traditional login for admin and passwordless login for general users, improving security and user experience.
- Utilised **Rails Admin** with custom actions and **XLSX import/export**, streamlining administrative workflows.
- Integrated **photo submissions** within questionnaires, syncing images directly to the client's file management API via **Active Record**.

Projects

Cheddar

<https://github.com/Ches-ctrl/Cheddar>

Developed a **Ruby on Rails** application leveraging **Stimulus.js** for dynamic front-end interactions. The platform streamlines the job application process for graduates by automating for-filling across various Applicant Tracking Systems.

- Engineered a form-filling tool using **Capybara** and **Selenium**, integrated with a **Chromium** browser, enabling users to apply to multiple jobs across various ATS directly within the application.
- Implemented front-end features, including the integration of an **external API** to dynamically fetch and display logos for companies and universities, enhancing visual engagement.

Education

Le Wagon

London, UK

Web Development

10/2023 - 12/2023

- **Ruby on Rails** (MVC architecture, Active Record, Devise authentication)
- **Object-Oriented Programming** and software design principles
- **SQL & Databases** (PostgreSQL, CRUD, JOIN queries, database modelling)
- **Front-End Development** (HTML, CSS, JavaScript, Stimulus.js)
- **Git & GitHub** (version control, collaborative development)

Florida State University

Tallahassee, FL, USA

Bachelor of Science in International Affairs (Political Science Concentration)

08/2016 - 08/2020

Skills

Ruby on Rails • Stimulus (Hotwire) • JavaScript • PostgreSQL • MS SQL Server • tSQLt • Minitest • Capybara • Selenium • Tailwind • Sass • Bootstrap • HTML • CSS • Git • SVN • Heroku
